REWARDS FOR INVESTORS

rate distribution:

10% allocated for marketing and development. 10% allocated for liquidity.

NXP provides returns to its holders from the very first day of launch, accompanied by the following

- Up to 30% will be automatically redistributed in
- proportion to the token balance held in the wallet.

REWARDS

These payments will be made in digital dollars, thereby eliminating the necessity for staking. In this manner, we incentivize holders and guarantee the sustainable growth of the project.

The redistribution percentages are derived from the fees accrued on each purchase and sale of the token. In essence, for every transaction conducted, you will receive a share of the profits proportional to the number of tokens you

possess.

• Total Supply: 20 billion NewXpay • Name: • NXP tokens Symbol: Scheduled Burn: A gradual reduction over two years, ultimately achieving 8 billion tokens, which may extend to six years. • Preliminary Allocation:

Initial **Token Distribution**

- 10 billion NXP Initial token allocation: • 25% for pre-sales
- 25% for listing
- 25% for marketing
- 10% allocated to the team

- 15% allocated for development

TOKENOMICS

TOKENOMICS NEWXPAY

If the remaining 10 billion tokens are deemed unnecessary, they will be systematically burned over a period of up to 6 years. The objective is to achieve 8 billion tokens in circulation within 2 years.

NXP Token Capabilities

Anti-Bot System: Established to safeguard transactions and promote a fair marketplace.

- Wallet Locking: In the event of theft, the contract
- permits the locking of compromised wallets.
- Furthermore, wallets belonging to the development
- team can be locked to avert mass sell-offs.
- Fee Redistribution: Up to 30% of transaction fees will be allocated

to holders.

NXP Valuation Approach 1 - Termination of the burning plan and contract

The gradual incineration of tokens may be expedited and finalized within two years, contingent upon the project's performance.

Regardless of the terminology, the contract will be resigned following the final listing, within the maximum duration of 2 years.

This will be contingent upon community engagement and project

efficacy.

Platform Launches and Functionalities

2 - Launch of the NewXpay Platform Following the listing phase, the NewXpay platform will be introduced with the subsequent features:

• Token Development: for Binance network contracts. •

Presale Framework: for Binance BNB network.

• Swap: Our platform will feature a swap system that

identifies optimal prices across major platforms, thereby

generating profitability without requiring token listings.

Exchange System

BNB while the seller receives USDT (digital dollar), thereby preventing financial loss for the merchant at the point of sale.

• Enterprise Database: The integration of enterprise systems directly into the blockchain. This innovative framework will be crucial in addressing the needs of governments pursuing solutions for digital currencies. Our technology will enable operations across multiple blockchains or facilitate integration with national blockchains.

A NewXpay está abrindo capital para investidores até o dia 1º de janeiro de 2026. Cada cota terá um valor aproximado de R\$ 20.000,00, representando 1% de participação na empresa.

Para investidores interessados em cotas menores, estão disponíveis 65 cotas de 0,25% por R\$6.000,00 cada.

- NewXpay is offering capital opportunities for investors
- Each share will possess an estimated value of R\$20,000.00,

- For individuals seeking to invest 1% or more, the share price is R\$20,000.00.

PRE-SALE DATE

Our initial presale is scheduled to commence on April 6, 2025, at 5:00 PM (Brasília time) and will continue until April 20, featuring a starting market price of \$0.00003 per token. The subsequent phase will begin on April 21 and conclude on April 30, 2025, with a price of \$0.000034 per token. The third presale phase will initiate on May 1, 2025, at a value of \$0.000039 per token.

The official launch is set for June 1, 2025, guaranteeing prompt access for investors.

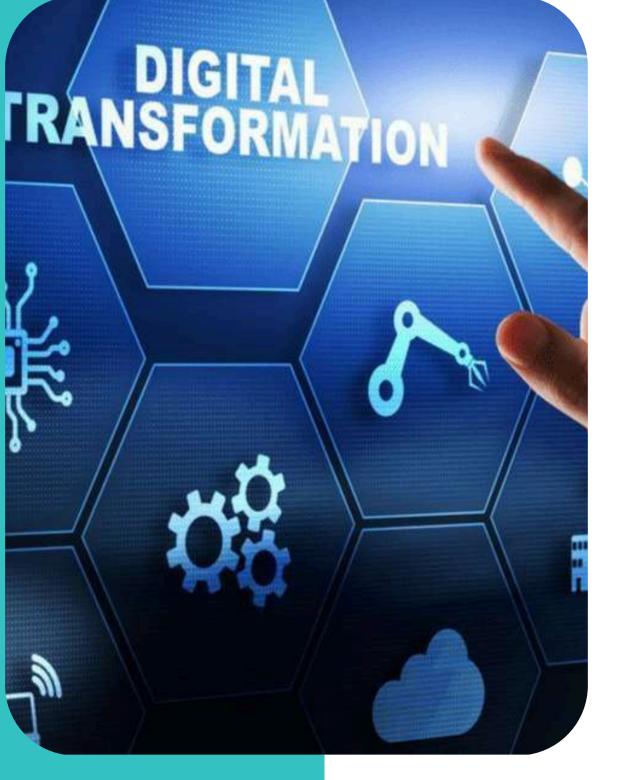

NewXpay Timetable

The MXP token will be renounced within a maximum of two years.

In September 2025, we will initiate the first phase of our launchpad, facilitating our swap for token purchase and sale operations. In November, we will conduct our inaugural token burn, followed by the launch of our token creation and pre-sale in January 2026.

In 2026, we will also initiate the pilot of our payment system.

Disruptive Framework

We strive to provide the premier platform available, featuring advanced buying and selling systems. tokens, automated tokenization, and a cutting-edge payment and inventory management system for companies.

- NewXPay transcends the conventional payment system
- It signifies an innovative financial model that integrates blockchain
- technology, transparency, and automation to transform the manner in
- which companies, governments, and consumers engage in transactions.

With a well-defined token burning strategy, robust protection mechanisms, and tools designed to foster ecosystem growth, the project seeks to accomplish its goals within two years—or potentially sooner, contingent upon market response.

FINAL CONSIDERATIONS

Our objective is to establish the platform as a resilient and secure solution, introducing innovation to the blockchain market.

Paul Merbold

Technical specialist in security systems, developer of Web 3.0 solutions, and author of the book "Blockchain from Scratch." As the developer of the NXP token and CEO of the NewXPay platform, I am leading an ecosystem that integrates security, efficiency, and genuine growth opportunities.

I have been involved in the blockchain market since 2017, during which I

have gained experience in launching token projects. speculative assets and tokens secured by diamonds and gold.

My mission is to render blockchain accessible to all. streamlining concepts through innovative solutions. Allocating responsibilities and distributing profits.
